

CalWORKs Proration Chart

This chart may be used for determining the prorated grant amount for the initial month of aid and also the first month of restoration of aid following a SAR 7-related discontinuance.

Example: The total monthly grant amount is \$150. Aid is to begin effective March 17th. March has 31 days so **.4839** will be used to determine the prorated grant amount for the initial month of aid as follows:

$\$150 \times .4839 = \72.585 . After rounding down, the prorated grant amount for March is \$72.

Day of the Month	28-day Month	29-day Month	30-day Month	31-day Month	Day of the Month
1 st	1.0000	1.0000	1.0000	1.0000	1 st
2 nd	.9643	.9655	.9667	.9677	2 nd
